Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 7/24/2007 has been entered.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 5,13, and 14 are rejected under 35 U.S.C. 102(b) as being anticipated by Welch et al (6,276,712). Welch et al disclose a protective device for an occupant of a vehicle comprising an inflator 8, an inflatable cushion 2 having first 3 and second portions 9, the first portion 3 being above the second portion 9 when the vehicle is upright, and in which inflation of the second portion 9 commences before inflation of the first portion 3. The second portion 9 comprises a material that decreases in length and is distributed substantially uniformly and continuously throughout the second portion 9 when inflated so as to create tension. The first portion 3 comprises a plurality of nodes separated by

Art Unit: 3616

uninflated material 14 abutting each node, wherein the nodes are adapted, when inflated, to be positioned at approximately head and torso level of the occupant. With regard to the order of inflation, the inflator 8 is directly coupled to the second portion 9 of the inflatable cushion 2 and thus gas from the inflator must inherently pass through the second portion 9 before entering the first portion 3. As such, inflation of the second portion 9 commences before inflation of the first portion 3.

Allowable Subject Matter

2. Claims 1,4,6 and 15-17 are allowed.

Response to Arguments

3. Applicant's arguments with respect to claim 5 have been considered but are moot in view of the new ground(s) of rejection.
